SUMMARY

Industrial Engineering (GPA: 3.49)

I am a second year Industrial Engineering student. I have an interest in technologies such as computational thinking and optimization. In the future, I want to become a data analyst. So currently, I like learning about technology by taking online courses and trying to apply optimization in the HMTI RnD Department as head of the department. This year, we succeeded in organize 6 of the 12 targeted projects in just two months.
